

Amendments to the Specification:

Please amend the paragraph beginning on page 17, line 12 as follows:

Figures 3A and 3B show Figure 3 shows an example in which a display image is zoomed in according to the present embodiment. In the example in Figure 4, it is assumed that an active window is maximized as the display image is zoomed.

Please amend the paragraph beginning on page 17, line 15 as follows:

When a zoom-in request is made by operating the input section 50 in the present embodiment, the display screen changes from a standard zoom factor status shown in Figure 3A to a zoomed-in status shown in Figure 3B. Comparing the display screen shown in Figure 3A with the display screen shown in Figure 3B, it can be seen that an active window 301 shown in Figure 3A is maximized as shown in Figure 3B so as to extend over the entire display screen and the content of the active window 301 is enlarged.

Please amend the paragraph beginning on page 17, line 20 as follows:

When a request to restore the zoom factor to its original value is made while the display screen is in a status as shown in Figure 3B, the active window 301 is reduced and the display screen is restored to its original status shown in Figure 3A.

Please amend the paragraph beginning on page 18, line 1 as follows:

While some windows other than the active window 301 may or may not be maximized in a status as shown in Figure 3B, it cannot be determined whether they are maximized or not in a status as shown in Figure 3B in Figure 3.

Please amend the paragraph beginning on page 18, line 14 as follows:

Figures 3A and 3B show Figure 3 shows an example in which a display image is zoomed in according to the embodiment; and
